EDUCATION

Information Security of Telecommunication Systems

College of Communication 54 Moscow

Certifications

CompTIA Security+ (2025)

Badges

RangeForce Cybersecurity Analyst Certificate (SOC Analyst 1-2 Elite, MITRE ATT&CK, Elastic, Ransomware Hunter, Penetration Tester)

SKILLS

- Threat hunting & Malware Analysis
- SIEM Monitoring (Splunk, IBM QRadar, Elastic SIEM)
- EDR Tools (CrowdStrike Falcon)
- Cyber Threat Intelligence (AbusIPDB, VirusTotal, Shodan, GreyNoise)
- Incident response & Log Analysis
- Cloud security (AWS) & Windows Security
- Cybersecurity Frameworks (MITRE ATT&CK, NIST)
- Cybersecurity Tools, Jira, Wireshark
- Vulnerability scanning, Risk Management
- Presentation and Communication Skills
- Log Correlation & Security Policy Review

ALEXANDER ISOEV

CYBERSECURITY ANALYST

PROFESSIONAL SUMMARY

Cybersecurity Analyst with practical SOC experience and a strong academic background in information security. Skilled in threat detection, incident response, and threat intelligence using tools like Splunk, IBM QRadar, Elastic SIEM, and CrowdStrike Falcon. Proficient in security tools such as firewalls, intrusion detection systems (IDS), and vulnerability scanners, which further strengthen my analytical capabilities. Confident in applying MITRE ATT&CK and NIST frameworks to analyze adversary techniques and reduce risk exposure. Focused on continuous learning, malware analysis, and proactive threat detection techniques.

EXPERIENCE

- December 2024 - August 2025

Cybersecurity/SOC Analyst

CYDEO / Philadelphia, PA

- Gained practical SOC experience through hands-on labs and real-world security simulations.
- Monitored and triaged security alerts using Splunk, IBM QRadar, and Elastic SIEM.
- Investigated suspicious activities and documented incidents according to SOC procedures.
- Utilized CrowdStrike Falcon EDR for endpoint detection, response, and threat containment.
- Applied MITRE ATT&CK framework to map attacker behavior and improve detection strategies.
- Created and managed Jira tickets to track incident response activities and escalation.
- Collaborated with system administrators and DevOps to align detection rules with infrastructure.
- Contributed to SOC playbook development and enhanced alert-handling workflows.

Projects

• Phishing Alert Triage

Analyzed simulated phishing email in Splunk; extracted IOCs, investigated domain/IP via VirusTotal, created response ticket in Jira.

• Malware Detection Lab

Identified suspicious PowerShell activity and registry changes; correlated with MITRE ATT&CK techniques and created SIEM rule.

• Stealthy Malware Detection

Detected and escalated a stealthy malware pattern using CrowdStrike and Sysmon, leading to timely containment.

• Scheduled Task Persistence Detection

Detected unauthorized scheduled task created by a suspicious process. Investigated using Elastic SIEM and CrowdStrike Falcon.

• SQLi and XSS Attack via Sqlmap

Detected automated SQL Injection and Cross-Site Scripting attacks targeting a public-facing web server. Correlated multiple events from a single external IP using SIEM and log analysis.

• Web Exploit with Remote Command Execution

Investigated a suspected remote command execution attack on a public-facing web app. Detected suspicious shell command patterns using SIEM and log analysis.
