EDUCATION

Information Security of Telecommunication Systems
College of Communication 54 Moscow

Certifications
CompTIA Security+ (2025)

Badges
RangeForce Cybersecurity Analyst
(SOC Analyst 1–2 Elite, MITRE ATT&CK, Elastic, Ransomware Hunter, Pen Tester)

SKILLS

- **SIEM:** Splunk, IBM QRadar, Elastic
- **EDR:** CrowdStrike Falcon, AES
- **Threat Intelligence:** VirusTotal, AbuseIPDB, Shodan, GreyNoise
- **Frameworks:** MITRE ATT&CK, NIST
- **Log Analysis:** Sysmon, Windows Event IDs, Raw Telemetry Analysis
- **Network Analysis Tools:** Wireshark, Suricata, TCPDump
- **Ticketing Tools:** Jira
- **Security Operations Skills:** Incident Response, Threat Hunting, Log Analysis, Vulnerability Scanning, Risk Management, Communication
- **Cloud & Systems:** AWS, Windows Security

PROFESSIONAL SUMMARY

Technical and results-driven Cybersecurity Analyst with hands-on SOC experience monitoring, detecting, and mitigating complex threats across hybrid cloud (AWS) and on-premises environments. Proven track record of investigating high-severity incidents, performing digital forensics, and leveraging Splunk, IBM QRadar, and CrowdStrike Falcon to optimize SIEM correlation logic. Skilled in mapping adversarial TTPs against the MITRE ATT&CK framework to hunt for threats and continuously improve detection coverage.

EXPERIENCE

August 2025 - Present **Independent Security Research** /Philadelphia, PA

Cybersecurity Researcher & Threat Analyst

- **Incident Response Knowledge Base:** Engineered a comprehensive threat analysis repository (purepootato.github.io), documenting 16 multi-stage L2/L3 intrusions across SIEM (Splunk, QRadar) and EDR (CrowdStrike Falcon) environments.
- **Advanced Endpoint Forensics:** Conducted deep-dive analysis on simulated hybrid attacks, deconstructing complex TTPs such as fileless Cobalt Strike beacons, SAM/SYSTEM hive dumping, and UMPPC hook bypasses mapped directly to the MITRE ATT&CK framework.
- **Network & Cloud Threat Correlation:** Correlated raw telemetry to reverse-engineer complex web exploits and AWS cloud compromises, establishing actionable containment playbooks.

December 2024 - August 2025 **CYDEO** / Philadelphia, PA

Cybersecurity/SOC Analyst

- **Incident Monitoring & Triage:** Reviewed, prioritized, and correlated high-fidelity security alerts across Splunk, IBM QRadar, and Elastic SIEM platforms to surface high-risk events and reduce false positives by 20%.
- **Endpoint Forensics & Containment:** Performed advanced alert triage and deep-dive forensic analysis in CrowdStrike Falcon, identifying complex evasion techniques such as UMPPC hook bypassing, process hollowing, and lateral movement via SMB admin shares, before validating host containment protocols.
- **Cloud Security & Audit:** Monitored and neutralized multi-stage AWS intrusions; correlated AWS CloudTrail logs with EDR telemetry to detect unauthorized IAM actions, root privilege escalation, and S3 data exfiltration.
- **Threat Enrichment & Hunting:** Decoded obfuscated payloads/URLs and mapped over 40+ adversarial techniques against the MITRE ATT&CK and D3FEND frameworks to enhance threat detection coverage.
- **Dashboards & Operational Metrics:** Designed and maintained custom Splunk dashboards to visualize real-time security events, monitor data ingestion health, and track key SOC operational metrics (MTTD/MTTR).
- **Reporting & Documentation:** Authored comprehensive post-incident technical reports, executive summaries, and JIRA playbooks to ensure structured investigation notes and repeatable handovers.
- **Infrastructure Hardening:** Collaborated across Blue Team tiers to provide actionable remediation steps for AWS IAM policies and systemd security configurations based on incident findings.
